Pre-engagement intake

Send this back with the answers you have. Gaps are fine. The call is where they get filled. What matters is that the repository, the commit and the date are unambiguous before any fee is quoted.

THE PROTOCOL

- What does the protocol do, in two sentences, for someone who has never used it?
- Which chains or runtimes, and is the code EVM Solidity, Solana/Anchor Rust, CosmWasm, Move, or a mix?
- What is the value at risk at launch, and what is it today? A rough order of magnitude is enough.
- Has anything been audited before? Attach the reports, including the ones that found nothing.

THE CODE

- Repository URL, and the commit or tag you want reviewed. Everything is reviewed at a pinned commit.
- Which paths are in scope, and which are deliberately out? Vendor libraries, generated code and mocks are normally out.
- How many source lines are in scope, excluding tests, libraries and generated code? `cloc` or `tokei` output is ideal.
- Does the code compile and do the tests pass at that commit? A repository that does not build costs review days.
- What is the deployment and upgrade model: immutable, proxy, multisig, timelock? Who holds the keys today?

THE ENGAGEMENT

- What is the deadline that cannot move, and what does it depend on? Launch date, exchange listing, investor call.
- Who is the named technical contact, and can they answer within a working day? Reviews stall on this more than anything else.
- What is the budget range you have in mind? It decides the tier, and it is better said now than after the scope is written.

WHAT HAPPENS NEXT

With these answers I write a one-page scope: targets, commit, exclusions, fee, delivery dates and payment terms. The fee is fixed before kickoff and does not move unless the scope does.

If the answers show the engagement is a bad fit (too large for the budget, or a deadline nobody can hit honestly), you will hear that in the same reply, not three weeks later.

Dodu Security is the trading name of Andrei Dodu. This document is a template, not legal advice; where the engagement is large enough to warrant it, have a lawyer read it.
